

Mass Spec Software, in Perfect Balance

The X500R QTOF System
Powered by SCIEX OS

We knew what you were looking for in a mass spec system, and we delivered on all fronts, with extra focus on the software

What we heard from you made it possible for us to engineer a superior system with a software solution that meets your needs and then some. **Here are just some of the features built right in, and the benefits they deliver to you:**

No-worry sample queues

The automated calibration feature seamlessly integrates mass calibration into your sample queues for rock-solid performance reliability.

Everything you need all in one place

Acquire, analyze, report-run the mass spec and perform full data review and analytics all within the same software solution.

Easy to learn and operate so you're more productive

A new thoughtfully designed user interface ensures faster learning and improved productivity.

Better system uptime with new tuning tools

New service diagnostic and tuning tools allow for easy troubleshooting, maximizing your uptime.

Process large compound lists—better, faster

Do it all better and faster with MRM and calibration displays, automated MS/MS library search and interpretation, and structural elucidation tools for unknowns.

Simple quant with confirmation for all your methods

Powerful new tools designed to deliver enhanced quantitative results from high-resolution MS data with included MS/MS library confirmation capabilities.
